Assessment & Plan

- Iron-deficiency anaemia: initiate oral iron supplementation (ferrous sulfate 200 mg TDS). Dietary counselling for iron-rich foods. Repeat CBC in 8 weeks.
 - Dyslipidaemia: lifestyle modification advised (low-fat diet, 30 min aerobic exercise daily). If LDL remains >130 mg/dL at 3-month review, commence statin therapy.
 - Palpitations: ECG ordered - normal sinus rhythm confirmed. Likely secondary to anaemia.
- Follow-up appointment: 10 February 2025.
